

Mock Exam: Comments

After checking the sample answers the following observations can be made about my answers.

- 1) Too much writing, need to be more precise.
- 2) Too much detail for each answer, but this is difficult to gauge.
- 3) Not ^{always} answering the question:
cases of giving details of how things work rather than describing what things are.

Suggest, Reaching course metered again, where answers were actually wrong:

Attempt the paper again. Do not look at the answers again until 2nd attempt completed
